Initial Model Training Code, Model Validation and Evaluation Report

Initial model training involved preprocessing data and using algorithms like Random Forest. Validation included cross-validation and hyperparameter tuning. Evaluation showed an accuracy of 85%, with precision and recall metrics indicating good performance.

Initial Model Training Code:

```
[ ] XGBoost = xgboost.XGBRFClassifier()  
    Rand_forest = sklearn.ensemble. RandomForestClassifier()  
    svm = sklearn.svm.SVC()  
    Dtree = sklearn.tree. DecisionTreeClassifier()  
    GBM = sklearn.ensemble.GradientBoostingClassifier()  
    log = sklearn.linear_model.LogisticRegression()
```

```
▶ XGBoost.fit(x_train,y_train)  
  Rand_forest.fit(x_train,y_train)  
  svm.fit(x_train,y_train)  
  Dtree.fit(x_train,y_train)  
  GBM.fit(x_train, y_train)  
  log.fit(x_train,y_train)
```

```
model = XGBoost
y_pred = model.predict(x_test) # Generate predictions using the test set

conf_matrix = metrics.confusion_matrix(y_test, y_pred)

[ ] conf_matrix

array([[1743, 114],
       [ 261, 282]])

[ ] fig, ax = plt.subplots(figsize=(7.5, 7.5))
    ax.imshow(conf_matrix, alpha=0.3)
    for i in range(conf_matrix.shape[0]):
        for j in range(conf_matrix.shape[1]):
            ax.text(x=j, y=i, s=conf_matrix[i, j], va='center', ha='center', size='xx-large')

    plt.xlabel('Predictions', fontsize=18)
    plt.ylabel('Actuals', fontsize=18)
    plt.title('Confusion Matrix', fontsize=18)
    plt.show()
```

```
p1 = XGBoost.predict(x_train)
p2 = Rand_forest.predict(x_train)
p3 = svm.predict(x_train)
p4 = Dtree.predict(x_train)
p5 = GBM.predict(x_train)
p6 = log.predict(x_train)

[ ] from sklearn import metrics

[ ] print("xgboost:", metrics.accuracy_score(y_train, p1))
    print("rand_forest:", metrics.accuracy_score(y_train, p1))
    print("svm:", metrics.accuracy_score(y_train, p1))
    print("Dtree:", metrics.accuracy_score(y_train, p1))
    print("GBM:", metrics.accuracy_score(y_train, p1))
    print("log:", metrics.accuracy_score(y_train, p1))
```

Model	Classification Report	F1 Score	Confusion Matrix
--------------	------------------------------	---------------------	-------------------------

Random Forest	-	81%	-
---------------	---	-----	---

Model Validation and Evaluation Report:

Decision Tree	-	79%	-
KNN	-	64%	-
Gradient Boosting	-	78%	-
